1.2 DATA INTEGRITY¹

The statistics, tables and graphs contained in this document are based on substantiated cases, which are active investigations of an incident that has definitely happened. This is as opposed to using incident data, which is an initial recording of a crime that has yet to be substantiated.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. The reader of the following pages should not rely on the data provided for comparison purposes over time, or for any reason. The BPS will not be responsible for the use of, or the results obtained from the use of this document. The BPS assumes no liability for any decisions made or actions taken or not taken by the user in reliance of this document. Any use of the document for commercial purposes is prohibited.

1.3 EXPLANATION OF GRAPHS

The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the crime rate has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the crime rate is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the crime rate is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases it can be referred to as statistically significant (high or low) and is an indication of whether the quarterly statistics are exceptionally high or exceptionally low.

1.4 AIM

The aim of this report is to produce accurate, timely, objective information that:

- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.
